### Montichiari, crossroads of the emergency system

## REAS 2022: training and international alliances

REAS International Exhibition for Rescue, Fire Fighting, Disaster Relief and Security is the leading fair in Italy for the emergency, first-aid and fire-fighting sector, a benchmark event, thanks not only to attendance by the main manufacturing and commercial businesses in the sector, but also its strong ties with Institutions, Government bodies and voluntary Organisations and Associations. Every year REAS attracts **more than 23,000 visitors**: a unique mix of operators (manufacturers,

distributors, representatives from organisations and institutions) and volunteers who operate within associations and organisations in the emergency system. The philosophy of REAS is to offer real tools to **innovate and develop the technical know-how of operators and volunteers**. REAS promises to offer plenty of opportunities to those who work at every level in the national emergency management protocol. Innovation, training and technical updating will, as always, be the basic objectives of visiting the fair.

### Interesting calendar of collateral events

REAS has always been offering also a rich program of events, **workshops, technical seminars and realistic outside demonstrations**. The REAS philosophy is in fact to mobilize all those operating under the Italian protocol in the emergency sector, giving companies and volunteer associations the opportunity to increase their technical abilities and train staff, improving their know-how and skills.

## Centro Fiera di Montichiari

Centro Fiera di Montichiari is the second largest exhibition center in the Lombardia Region.

**INTERSCHUTZ Events**  
 Worldwide

The strategic partnership between Centro Fiera di Montichiari and Deutsche Messe AG, which began in 2014, has increased the international attraction of the REAS brand, encouraging the incoming of buyers and the presence of specialised foreign exhibitors at the fair. The alliance with INTERSCHUTZ and the constant exchange of know-how with our German partners are essential factors

in developing the potential of a fair like REAS which already has a strong international vocation. In 2022 the brand INTERSCHUTZ can be trusted at events on four continents.
